

CELLMED METHOD STEP 3 – SKIN PROTECTION

MOISTURE Perfect Hydration 24h Care

Owing to stress, a poor lifestyle, too much UV exposure, and too little fluid supply, the skin becomes dehydrated, declines in suppleness, feels tight, and reacts more sensitively. Perfect Hydration 24h Care gives the skin what it needs most: an intense moisture supply and protection from moisture loss. The unique feature of this medically based skin care range is the highly effective combination of hyaluronic acid and the extremely well tolerated Derma Membrane Complex. The skin is thus able to replenish the moisture loss and optimize its moisture retention capacity.

RETAIL

PROFESSIONAL

AREA OF APPLICATION

- Moisture-deficient skin
- Flaky, dry skin
- Feeling of tightness
- Wrinkles caused by dryness

EFFECT

- Moisturizes the skin perfectly
- Promotes toned, supple skin
- Reduces wrinkles caused by dryness
- Makes flaky, dehydrated skin appear smooth and nourished again
- Protects the skin from the damaging effects of free radicals

MAIN INGREDIENTS

Hyaluronic acid

optimizes the skin's moisture binding capacity, protects it from external influences, and reduces transepidermal water loss (TEWL)

DMC

can be described as "skin-similar", and is therefore very skin-friendly and enables the ingredients to penetrate perfectly.

Vitamin E acetate

has an antioxidant effect against free radicals

APPLICATION

Daily, morning and evening: Apply a hazelnut-sized amount evenly to cleansed skin.
