

INTENSE MOISTURE TREATMENT

INTRODUCTION

Dry skin can have a number of causes. For example, if the skin's protective barrier is not perfectly intact there is increased trans-epidermal loss of moisture but an inadequate intake of fluids may also be the cause. This skin is thirsty.

It has **dryness lines and wrinkles** and **appears exhausted**.

An intense boost of moisture with a depot effect is what this skin needs.

The INTENSE MOISTURE TREATMENT satisfies all this skin's needs.

EFFECT

- Dryness lines and wrinkles are reduced
- The skin is intensively moisturized
- Thanks to the premium primary ingredient in the Intense Moisture Formula, madecassoside, water transport within the skin is optimized and the skin's protective barrier is strengthened
- Hyaluronic acid, which acts like a magnet for water, binds moisture within the skin over the long term
- This treatment ensures the lipid and moisture levels in the skin are balanced

TREATMENT OUTCOME / EFFECT

Intensively moisturized, fresh, and plump skin.

TREATMENT TIME

60 minutes

PRODUCT RECOMMENDATION – TREATMENT

Cleansing and toning:	Skin-specific
Peeling:	Biodroga MD Skin Refining Peel
