

BIODROGA MEDICAL INSTITUTE

ACID TREATMENT

The BIODROGA MEDICAL INSTITUTE Acid Treatment is a surface peeling. Depending on the individual skin condition, a repeated application at regular intervals (cure) may significantly improve the skin tone.

Tailored to the individual skin condition, a cure of 5 to 6 treatments is recommended. The alternative: a freshening up as individual treatment.

FOR WHICH SKIN TYPES/SKIN PROBLEMS IS THIS TREATMENT SUITED?

- Impure skin
- Large pores
- Lines and wrinkles
- Disturbed hornification
- Age spots
- Irregular complexion
- Pigment spots
- Light-induced damages
- Acne scars
- Pale, gray skin

CONTRAINDICATIONS

- Dark skin may react with a local hyperpigmentation
- Skin diseases
- Damaged skin by medicaments, diseases, chemotherapy
- Disturbed skin-protection barrier (in this case first rebuild the barrier function with Hyper Sensitive)
- Sensitive, irritated skin
- Sunburn
- Wounds or open skin areas
- Inflammatory acne

SIDE EFFECTS AND COMPLICATIONS

After an acid treatment skin may react with redness which, however, usually disappears within a few hours. Depending on the duration of the treatment, skin may peel off.

WHAT TO OBSERVE DIRECTLY AFTER THE PEELING

After an acid treatment skin's sensitivity to light increases. Therefore, independent of the weather, the application of a sun protection (at least SPF 30) is absolutely required.

Sun, artificial sun, extreme heat or coldness should be avoided in the first days after treatment. During the cure treatment, no peelings should be made at home.

INTERVALS AND DURATION OF THE TREATMENT

5 to 6 treatments are required for an improvement of the skin tone.

The treatments should take place at intervals of 7 to 10 days.

One treatment lasts about 30 minutes.

The recommended time to let the peeling take effect is 3 to 5 minutes maximum.
